EXECUTIVE SUMMARY

AI leader who built India's first sovereign, air-gapped Agentic RAG platform — now serving 22 million users at 99.9% uptime with zero third-party data exposure. Twenty years of shipping production AI across fintech, healthcare, and media, with ₹20 Cr+ AI budget ownership spanning GPU procurement, vendor contracts, and team operations. Trusted board-level advisor and Guest Faculty at IIM Indore and ISB for Executive MBA programmes on AI strategy and governance.

CORE COMPETENCIES

Agentic AI	LangGraph, LangChain, n8n, Multi-Agent Orchestration, Agentic RAG	LLM Serving	vLLM (PagedAttention), Ray Serve, GPT-OSS 20B, Mistral 7B, Gemma 7B
Fine-Tuning	LoRA, PEFT, Domain-Adaptive Training, OpenAI Source Model Adaptation	Vector Search	all-MiniLM-L6-v2, Elasticsearch kNN, Semantic Retrieval, RAG Pipelines
AI Safety	Guardrails.ai, PII Detection, Toxicity Screening, Prompt Injection Prevention	MLOps	MLflow, Ragas (RAG Eval), Airflow, Prometheus, Grafana, Continuous Eval
Infrastructure	On-Premise GPU (NVIDIA A40), DXC, Docker, Kubernetes, AWS, Firebase	Automation	FastAPI, n8n (30+ workflows), Python, REST, Enterprise Workflow Design

PROFESSIONAL EXPERIENCE

SBI Card — Gurgaon, India

April 2023 - Present

Deputy Vice President — Generative & Agentic AI

Owns the Generative & Agentic AI function: 15+ cross-functional team (engineers, data scientists, vendor partners). ₹20 Cr+ AI budget accountability spanning GPU procurement, vendor evaluation (NVIDIA, DXC Technology), and board-level AI roadmap.

Sovereign On-Premise Agentic RAG Platform

- Built India's first air-gapped RAG ecosystem** for fintech — ensuring 100% data sovereignty and financial-grade security with zero third-party data exposure.
- Scaled to 22M+ users and 21M+ monthly transactions** at 99.9% uptime SLA. Integrated 45+ enterprise components including LangGraph/LangChain for stateful multi-agent orchestration, vLLM for high-throughput inference, and Ray Serve on NVIDIA A40 GPUs.
- Intelligent model routing:** Deployed GPT-OSS 20B, Mistral 7B, and Gemma 7B with automated routing — Mistral for <500-token tasks, GPT-OSS for 24k-token long-context workloads, Gemma for structured reasoning.
- LoRA-based fine-tuning (PEFT)** on open-source models, enabling domain-adaptive learning on proprietary data without external infrastructure exposure.
- Guardrails.ai pre/post pipeline** — PII detection, toxicity screening, prompt injection prevention, and hallucination validation across all model interactions.
- Continuous evaluation loop** using Ragas and MLflow: faithfulness score of 0.90, relevancy score of 0.94 across 22M+ interactions.
- Course correction:** Early deployments showed unacceptable hallucination rates on long-context queries. Led a 6-week model re-evaluation cycle, replacing initial selection with GPT-OSS 20B — improving faithfulness from 0.74 to 0.90.

Strategic Business Applications

- **SBICard.com search revamp:** Replaced keyword lookup with AI-powered semantic search, improving product discoverability and customer self-service rates.
- **RAG-powered offers engine:** Personalised card offers based on spending patterns, driving 400% growth in AI-driven bill payments.
- **AI co-pilot for customer care:** Real-time, policy-compliant response generation during live interactions — 75+ FTE cost savings and reduced Average Handle Time.
- **Internal GPT for developers:** Secure, air-gapped portal for engineering teams to query internal codebases and API documentation.
- **Board-level AI roadmap:** Authored the enterprise-wide AI transformation strategy. Led multi-million dollar vendor evaluation across DXC, NVIDIA, and specialist AI partners.

PROFESSIONAL EXPERIENCE — CONTINUED

Brane Group — Global Jan 2022 - Apr 2023
Analytics Delivery Head

Led a 45-member cross-functional analytics and engineering team delivering production AI/ML systems across 6–8 concurrent client engagements in healthcare, fintech, and ad-tech.

- **Solutions architecture:** Designed ML-powered systems including ambulance dispatch optimisation (healthcare), fraud detection (fintech), and campaign ROI optimisation (ad-tech) across parallel delivery streams.
- **End-to-end delivery ownership:** Managed full project lifecycle — client discovery, solution architecture, model deployment, and client handover — across 6–8 simultaneous engagements.
- **Engineering standards:** Established delivery standards and engineering practices for the analytics function, reducing project cycle time and improving cross-team consistency.

Pixstory — Gurgaon, India Jan 2019 - Jan 2022
Head of Technology Architecture

Led technology architecture and product engineering for a social media platform. Managed 8–10 person engineering team across ML, backend, and product functions.

- **Recommendation engine:** Built a custom ML-based recommendation engine from scratch — 180% improvement in user engagement through personalised content delivery.
- **NLP at scale:** Architected semantic analysis and automated tagging workflows processing 1M+ posts, reducing manual content operations.
- **Growth support:** Led technical product strategy and go-to-market execution supporting 100K+ user acquisition from architecture through launch.

The Indian Express — Noida, India Jul 2009 - Jan 2019
Chief Manager — Business Intelligence

Owned data analytics, business intelligence, and audience insights for one of India's largest news organisations.

- **Predictive analytics:** Built predictive models for subscription churn forecasting and collection management, transforming the digital subscription architecture.
- **NLP-driven insights:** Applied text mining to unstructured consumer feedback — reduced user detractors by 50%, directly informing product and editorial decisions.

Earlier Career

Banking and financial services foundation — building the consumer data, sales analytics, and risk domain expertise that directly informed enterprise AI strategy at SBI Card.

- **Axis Bank** — Sales Manager · Aug 2008 – Jul 2009
- **ICICI Bank** — Sales Manager · Jun 2006 – Aug 2008

THOUGHT LEADERSHIP & SPEAKING

Guest Faculty, ISB (Indian School of Business) — Teaches Generative AI for Business and Responsible AI as part of the Executive MBA curriculum.

Guest Faculty, IIM Indore — Lectures on AI Strategy, Technology Leadership, and AI Governance for Executive MBA programmes.

LinkedIn Thought Leader — Regular author on sovereign AI architecture, LLM fine-tuning trade-offs, RAG evaluation frameworks, and multi-agent orchestration for enterprise audiences. [linkedin.com/in/kumar-gyanam](https://www.linkedin.com/in/kumar-gyanam)

EDUCATION

Advanced Diploma in Programming · IIT Madras	Competitive Admit
<i>Top 1.7% of 60,000+ applicants (~1,000 selected)</i>	
Certificate in AI-Powered Marketing · IIM Calcutta	2021 - 2022
MBA — Marketing & Strategic Management · IRM	2004 - 2006
B.Sc. — Mathematics & Statistics · Ranchi University	2001 - 2004
